

TANNU JHA

Cloud DevOps Engineer

Gurugram, India | +91 8700808231 | tannujha0610@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Cloud DevOps Engineer with nearly 2 years of experience in enterprise IT, production operations, service deployment, troubleshooting, automation, and DevOps practices. Hands-on experience with AWS, Terraform, Docker, Kubernetes, GitHub Actions, Jenkins, Linux, and CI/CD workflows. Strong networking foundation across TCP/IP, DNS, IPv4/IPv6, VPC, subnetting, and routing, with a focus on cloud infrastructure, automation, monitoring, and reliable deployment workflows.

TECHNICAL SKILLS

Cloud:	AWS (Primary), Azure & GCP (Fundamentals)
Operating Systems:	Linux, Bash
Containerization:	Docker, Kubernetes
CI/CD:	GitHub Actions, Jenkins
Infrastructure as Code:	Terraform
Version Control:	Git, GitHub
Monitoring:	CloudWatch, Prometheus, Grafana
Automation:	Python, Shell Scripting
Networking:	TCP/IP, DNS, IPv4/IPv6, VPC, Subnetting, Routing

PROFESSIONAL EXPERIENCE

Colt Technology Services

Gurugram, India

Cloud DevOps Engineer

Aug 2024 – Present

- Supported cloud and production deployments, release validation, and operational activities, troubleshooting deployment and configuration issues to maintain service reliability.
- Developed and improved CI/CD workflows and automation using Git, scripting, and DevOps practices to reduce repetitive operational effort and improve deployment efficiency.
- Performed production monitoring, health checks, log analysis, and incident troubleshooting to identify service issues and validate successful deployments.
- Supported Infrastructure as Code and repeatable provisioning using Terraform and version-controlled configuration.
- Applied security, access-control, and operational practices, including configuration validation, logging, monitoring, and change-management procedures.

FEATURED PROJECTS

AWS Infrastructure as Code Deployment

[Project Link](#)

AWS · Terraform · GitHub Actions · CloudWatch

- Designed and deployed production-style AWS infrastructure using Terraform following Infrastructure as Code principles.
- Automated infrastructure provisioning through GitHub Actions for repeatable, version-controlled deployments.
- Implemented CloudWatch dashboards, alarms, and SNS notifications for proactive monitoring and operational visibility.
- Configured VPC, Security Groups, Application Load Balancer, Auto Scaling, and compute resources with a focus on scalability and reliability.

SportsOps — Match-Day Operations Platform

Next.js · TypeScript · Supabase/PostgreSQL · Vercel · GitHub

- Built a match-day operations platform for corporate sports events covering player check-in, fixtures, notifications, match status, and admin operations.
- Implemented real-time operational updates using Supabase Realtime and integrated Web Push notifications for event communication.
- Used GitHub-based development and Vercel deployment workflows to maintain and iterate on the application.

[Project Link](#)

Internal Quality Assignment Automation

Bash · Automation · GitHub

- Developed an internal automation utility to simplify repetitive quality-assignment workflows.
- Automated recurring operational activities to reduce manual effort and improve workflow consistency.

EDUCATION

Maharaja Surajmal Institute of Technology

New Delhi, India

B.Tech, Electronics & Communication Engineering

2020–2024 | CGPA: 8.35/10

CERTIFICATIONS & ACHIEVEMENTS

AWS Solutions Architect Associate (SAA-C03) — Udemy Course Completion

Deutsche Telekom TalentHack — Build Sprint

Aug 2026

Developed a configurable decision engine with a team during a 24-hour build sprint, contributing to Rule Management and Persistence using FastAPI, REST APIs, SQLAlchemy, and database migrations. Shortlisted for an interview based on the developed solution.
